

PRESS RELEASE

AGRITECH.BIO Surpasses €3 Million Revenue in 2025, Marking a Major Corporate Milestone

CEO Statement:

“Reaching over €3 million in revenue is not just a financial milestone — it is proof of trust from our customers, partners, and distributors worldwide. This growth motivates us to continue innovating and expanding internationally.”

(Piano di Follo, May 2026) – AGRITECH.BIO SRL proudly announces a major milestone in its corporate history, surpassing €3,047,000 in annual revenue in 2025, following extraordinary growth from €27,000 in 2023 and €1,229,000 in 2024.

This achievement reflects AGRITECH.BIO's rapid expansion in the international biological agriculture sector and confirms the increasing market demand for its innovative organic fertilizers, amino acid technologies, and sustainable crop nutrition solutions.

What makes this growth especially meaningful is its foundation: a diversified and steadily expanding customer base, demonstrating resilience, broad market acceptance, and long-term stability. Rather than relying on a small number of major accounts, AGRITECH.BIO's success is built on broad-based customer acquisition across multiple markets and segments — a strong indicator of sustainable commercial strength.

Over just three years, AGRITECH.BIO has evolved from an emerging startup into a recognized growth company serving modern agriculture with science-driven biological inputs.

AGRITECH.BIO remains committed to:

- Sustainable agricultural innovation
- Organic fertilizer excellence
- International market expansion
- Advanced biological plant nutrition
